More about the Source

- In our source dataset we have three months of employee present, absence list and how many days they did work from home.
- As we can see there are three sheets with month name written on it interpreting the month
- Each rows contains employee code and name and its data
- On the columns we have particular date

Ask

- Develop a Dashboard that has overall presence attendance, work from home percentage and leave count as a KPI tiles
- As well as has individual presence attendance, work from home parentage and leave count
- Also we can filter and see each employee presence date wise.
- Add graph for each KPI tiles to see the trends.
- Add each KPI metric day of week wise
- Add slicer to filter month wise data
- Finally put a date slicer to filter between based on specific dates
- Additionally automate the dashborads to accommodate future data.
